From the 17th century onwards, Dutch merchants and traders have traveled the seven seas in search of new opportunities. In the Golden Age, Amsterdam became the warehouse of the world and the gateway to Europe. Dutch scientists unravelled the mysteries of daily life, while painters presented a new vision of reality and changed the world of art.

The inspiring stories of courageous Dutch pioneers, innovative entrepreneurs, talented artists and other notable historic characters from the Dutch Marco Polo to Rembrandt and Anne Frank have captured our imagination for centuries.

The high-end coffee table book 'Kingdom by the Sea' offers an exclusive peak into the lives of people who pushed the boundaries of a country limited in size but great in hopes and dreams.

*'The writing includes behind-the-scenes history and tidbits that make history interesting and increases one's knowledge and understanding of the Dutch and their country'*
